EASTERN SOLENT COASTAL PARTNERSHIP

New coastal defences for North Portsea Island

£58m of government funding has been secured to improve flood defences across the north of Portsea Island. The new coastal defences will cover the coastline from Tipner to Milton Common.

They are needed to reduce the risk of flooding from the sea for the next 100 years to over 4,000 homes, nearly 500 businesses and the transport network including the railway line, Ports Bridge Roundabout and the Eastern Road.

When the new defences are finished they will provide the area with one of the highest standards of flood protection in the Country, outside of London.

Tipner Lake Phase 3
