Ajay - Coastal Engineer

“ Working with Coastal Partners has given me the opportunity to work on some of the largest coastal defence projects in the UK. The variety in the Partnership has helped me to advance as an engineer in lots of ways both on and off the construction site. ”

Alex - Coastal Project Engineer

“ The range and variety of projects I have been involved in with Coastal Partners have allowed me to develop as an engineer and I am frequently involved as technical support in other projects. My typical working week is quite varied. ”

Amy - Coastal Project Engineer

“ I joined Coastal Partners having completed an MSc in Engineering in the Coastal Environment and I haven't looked back. I have gained so much valuable experience, from Site Supervisor skills to Project and Contract Management skills. I am excited for what the future holds for us all working at Coastal Partners. ”

James - Team Leader

“ As soon as I joined I was able to apply my skills and experience to projects, working alongside colleagues in a Programme Management Office. I really enjoy that there are so many people here at Coastal Partners who are committed to working on shared goals for the community around us. ”

Jon - Coastal Technician

“ The work we do has a positive impact on our local communities. I've lived in the area throughout my life, and it feels great to be able to give back by offering protection to areas at risk of flooding and erosion. ”

Laura - Coastal Environmental Project Engineer

“ Since day one, I have been given the opportunity to develop and obtain new skills in a variety of different areas - no two days are the same! ”

Richard - Coastal Project Engineer

“ I joined the team over 10 years ago and have progressed from a Graduate Civil Engineer to a Technical Lead. I'm given the trust and freedom to explore more innovative ways of working every day, including the use of UAV systems into all aspects of our projects. I'm even a qualified drone pilot! ”

Join Our Team

Coastal Partners is an innovative Partnership made up of a team of specialist coastal officers and engineers who manage 162 km of the southern UK coastline.

Our comprehensive coastal management service is driven forward by the central notion that coastal processes do not respect boundaries. We have implemented a

joined up approach so that more can be achieved for coastal communities.

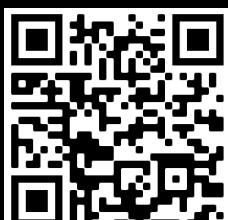

Our pioneering approach helps to protect homes, businesses and environments, whilst facilitating place-making and delivering huge efficiencies.

Be a part of it.

We are an inclusive employer and aim to give all members of staff a positive employment experience, whilst offering opportunities to gain skills and experience.
