

Langstone Coastal Defence Study

Exhibition Feedback Form

We would like to hear your thoughts on the shortlisted options for improved coastal defences in Langstone. The results from the questionnaire will feed into the options appraisal process for the preferred option.

To determine the preferred options for the Langstone frontage, the shortlist will be appraised not only on whether options are economically affordable, environmentally sustainable and technically feasible, but also on whether they are socially acceptable within the community.

Please answer our short questionnaire; your time is greatly appreciated.

Please look at the shortlisted options for each area and on the map, tick all the options that you find acceptable.

You can return the form at the event today, or post it to:

Eastern Solent Coastal Partnership,
Havant Borough Council,
Southmoor Depot & Offices,
2 Penner Road,
Havant,
PO9 1QH

Further information is available at www.escp.org.uk

1. What is your interest in the Langstone Coastal Defence Study? [Tick all that apply]

Privacy Statement: The information provided by you in this questionnaire will only be incorporated into the next stage of the options appraisal process. It will not be used in a manner which would allow identification of your individual responses. Your address/contact details, if given, will be removed from the data as soon as the initial analysis is complete. You do not have to participate and even if you do, you do not have to answer any survey questions you would rather not. For a copy of our full data privacy statement, please contact Havant Borough Council.

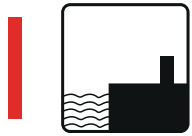

Area 1 - Mill Lane and Harbourside

Please tick all options that you find acceptable on the map:

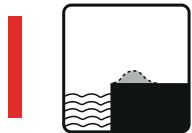

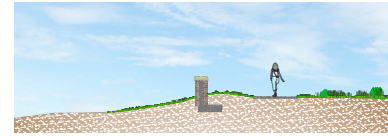

Shortlisted Options

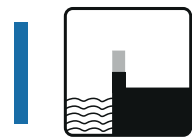

Key for map

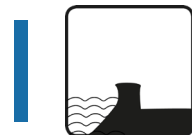

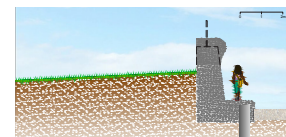

Setback floodwall :
New floodwall setback from the existing defence.

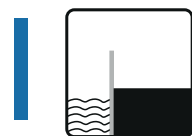

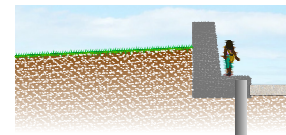

Earth embankment :
Compacted earth structure.

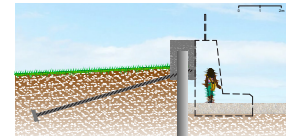

Crest raising :
Increasing the height of the existing defences.

Seawall :
A new higher vertical hard defence.

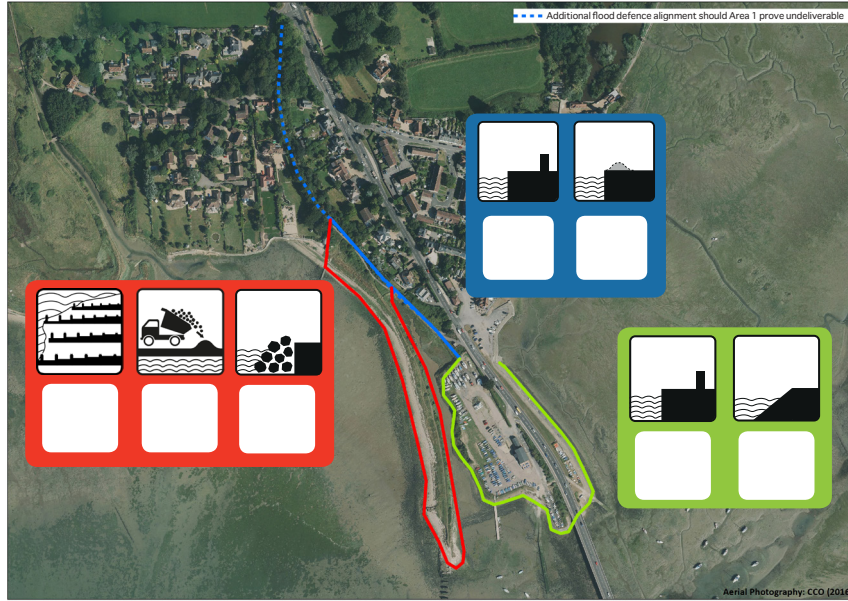

Sheet piling :
Vertical steel sheets driven into the ground in place of, or behind the existing defence.

Working together - protecting our coastline

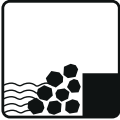

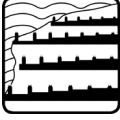

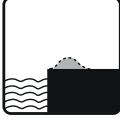

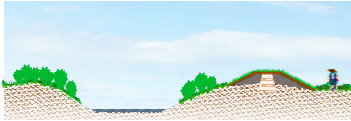

Area 2 - Langstone Sailing Club and Spit

Please tick all options that you find acceptable on the map:

Shortlisted Options

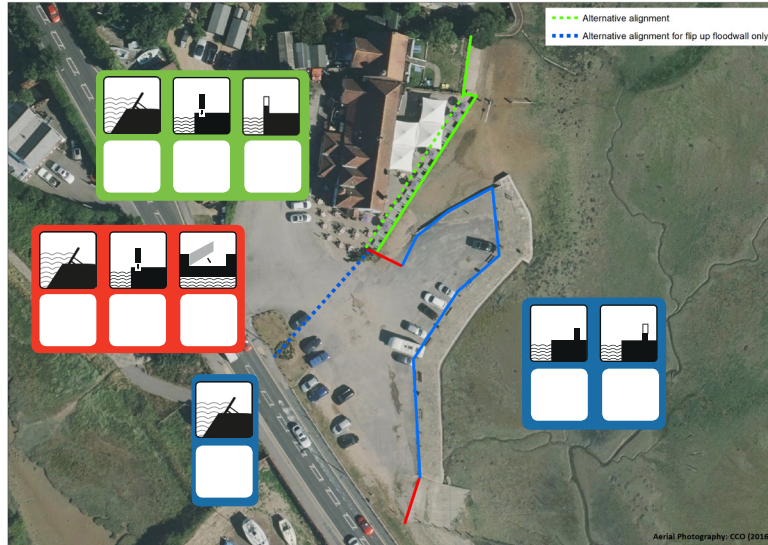

Key for map

| | | | |
|---|---|---|---|
|  |  | Rock armour : Sloping structure created using rock. |  |
|  |  | Beach Replenishment : Addition of material to the beach to increase the beach levels. |  |
|  |  | Groynes : Structures placed along a beach to help capture material and retain the beach levels. This option would be in combination with beach replenishment. |  |
|  |  | Earth embankment : Compacted earth structure |  |
|  |  | Setback floodwall : A new floodwall setback from the existing defence. |  |
|  |  | Revetment : Sloping hard defence |  |

Area 3 - Langstone Village Ship Inn

Please tick all options that you find acceptable on the map:

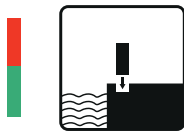

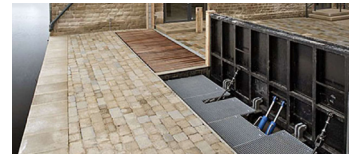

Shortlisted Options

Key for map

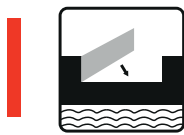

Flip-up floodwall :

An in-situ barrier that lies flat to the ground and can be raised to form a flood defence when required.

Demountable defence :

A temporary defence that can be put in place when required.

Flood gate :

A watertight gate left open during normal conditions, but can be closed to form a flood defence when required.

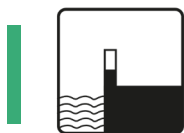

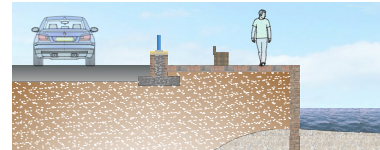

Setback floodwall :

A new floodwall setback from the existing defence.

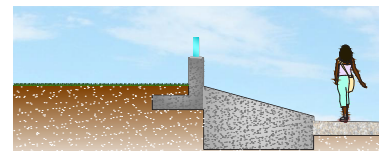

Setback glass topped floodwall :

A new floodwall setback from the existing defence and topped with reinforced glass panels.

Glass topped floodwall :

Raising the height of the existing structure through crest raising and topped with reinforced glass panels.

Working together - protecting our coastline

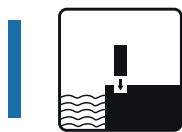

Area 3 - Langstone Village Coastal Footpath

Please tick all options that you find acceptable on the map:

Shortlisted Options

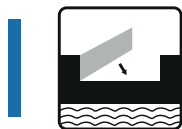

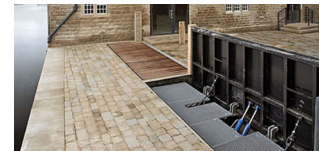

Key for map

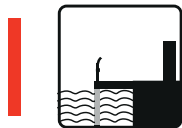

Demountable defence :
A temporary defence that can be installed when required.

Flip-up floodwall :
An in-situ barrier that lies flat to the ground and can be raised to form a flood defence when required.

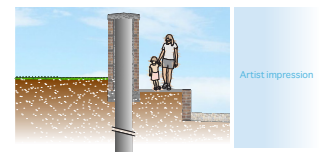

Flood gate :
A watertight gate left open during normal conditions, but can be closed to form a flood defence when required.

Setback floodwall and boardwalk :
A new floodwall and wider walkway.

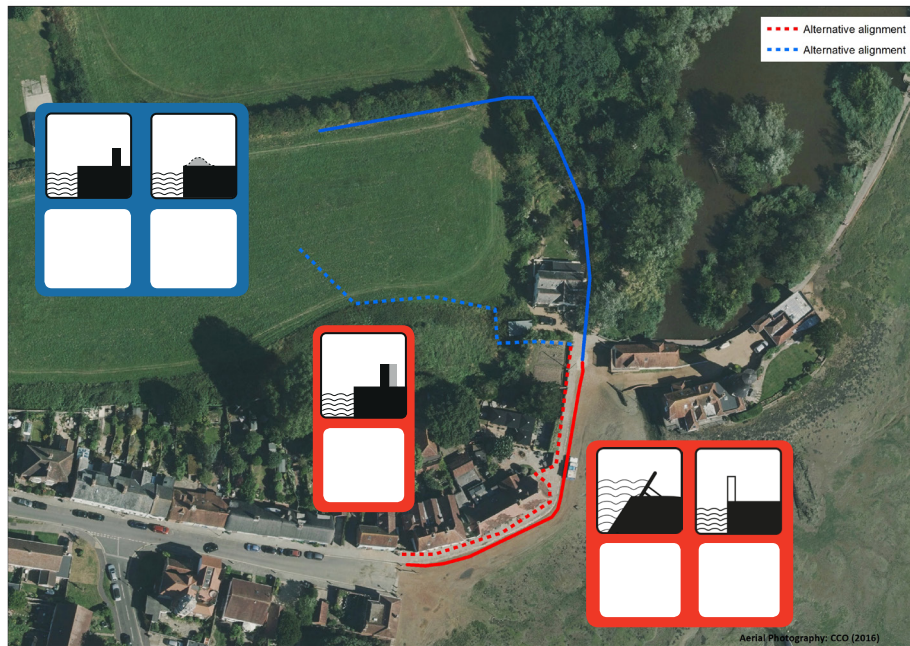

Reinforce / replace existing defences :
Reinforce boundary and building walls to withstand higher floodwaters and flood proof buildings.
